

colozüri.ch AG – Site Rules

All users and visitors of the „colozüri.ch“ site take note of the following rules and accept these from the date of first entry to the premises. If these rules are violated, action will be taken. colozüri.ch AG reserves the right to deny access to people and parties who do not follow these rules.

General information

- All access to the site is logged by the admission control system and is recorded by surveillance cameras.
- For questions please refer to the site manager via email (support@colozueri.ch) or telephone (031 517 77 69)

Regulations

- All visitors are required to identify themselves with an official ID card on request. All site users must be reachable via their registered mobile phone number in case of emergencies.
- No people passage through the goods gate and emergency exits. All entrances/exits must be made through the mantrap. All expenses on infringement will be charged.
- No storage of inflammable materials inside the site or racks (e.g. empty packaging, paper, etc.).
- It is strictly forbidden to eat, drink or smoke (incl. e-cigarettes) inside the site. Please keep the site clean: all waste must be disposed of (small items in the provided bins). Work which causes dust as well as soldering, welding and grinding is prohibited.
- Opening the raised-floor is strictly forbidden. Needed cabling work is solely done by colozüri.ch personnel.
- The attachment of adhesives, stickers, etc. on the racks is not allowed. The existing labeling of the racks may not be removed. The installation of cameras on or inside the racks is not permitted.
- Cabling work (power, network, fiber) outside of the customer rack may only be done by personnel of colozüri.ch AG. Installations have to be ordered via the site manager.
- Any contact or manipulation of the site equipment (fire detection and suppression systems, air conditioning units, electrical switchboards etc.) is strictly forbidden.
- All doors must always be kept closed. The blocking of doors is not allowed at all times.
- The cold aisle doors must be kept closed at all times – even during work. Unused rackspace / height-units have to be closed with blind-plates on the front side. After installation or removal of equipment, the blind-plates have to be re-installed properly.
- All of the equipment within the rack has to be placed properly according to the cold-/warm aisle principle (the front of the servers have to be in the cold aisle).
- The loading platform in front of the building is only to be used for moving goods in and out and may not be used as parking lot. There are labeled parking lots in the garage.
- colozüri.ch provides a free WLAN access to its users (SSID [wifi@colozueri](mailto: wifi@colozueri)). Improper use will be prosecuted. For organizational reasons (limited number of channels), users are advised not to make their own WLAN installations.
- The management of colozüri.ch AG decides about exceptions, special authorizations or changes to these rules.
